

Code Inspection Form

The purpose of the code inspection process is to promote adherence to requirements, accuracy, quality and completeness. We want to identify code defects but not specify corrections. A line numbered code listing should be stapled to this form and distributed one copy each to reviewers. If the same general error occurs frequently, try to specify all errors of one type in one defect description item.

Project name: _____ Reviewer name: _____

Code author(s): _____ Review date: _____ Moderator name: _____

Description of software reviewed: _____

1. Defect description:

Line number(s): _____ Severe: __ Moderate: __ Minor: __

2. Defect description:

Line number(s): _____ Severe: __ Moderate: __ Minor: __

3. Defect description:

Line number(s): _____ Severe: __ Moderate: __ Minor: __

4. Defect description:

Line number(s): _____ Severe: __ Moderate: __ Minor: __

5. Defect description:

Line number(s): _____ Severe: __ Moderate: __ Minor: __

6. Defect description:

Line number(s): _____ Severe: __ Moderate: __ Minor: __
