

You have accessed an old direct web link to one of my web book DF files.

Please read this book using the HTML link at <http://markwatson.com/opencontent>

Starting in March 2007, I am taking a new approach to distributing my web books:

- During development (writing), my web books are accessible as HTML linked from <http://markwatson.com/opencontent>
- When the books are complete, the HTML links will point to the latest version of the book and additional links will reference PDF and a physical book purchase links at lulu.com

I am in the process of streamlining my writing production. I work using Latex (TexShop) and OmniGraffle for technical diagrams. A simple automated build process “publishes” media for free viewing on my web site, and generates media for purchases at lulu.com. My web books will always be available for free reading on m web site.

Best regards,
Mark Watson
